SUMMARY

Creative and detail-oriented Full Stack Web Developer leveraging a background in Customer-service and management. Earned a certificate in Full Stack Web Development from University of Washington where over 200 classroom hours were devoted to hands-on programming. Proficient in time management and team management. Experienced with working as a team on GitHub and Heroku to create and deploy applications. Adaptable to every situation.

TECHNICAL SKILLS

Languages: JavaScript(ES6), HTML5, CSS
Tools/Libraries: Node, Express, GitHub, Heroku, MongoDB, MySQL, jQuery, Handlebars, React, Redux
Methodologies: MVC, OOP, ORM, ODM

PROJECTS

Panda Patter | https://github.com/Jessica264365/PandaPatter | https://pandapatter.herokuapp.com/
A flashcard web application that enhances the Google Translate API. The user can create flashcards in any language of their choice.
- Collaborate with a team of 4 developers to design, develop, debug and deploy the application within 2 weeks.
- Participated in design and planning sessions to provide guidance and feedback
- Front-end and Back-end development; set up Firebase authentication, created protected routes, set up the database, created the ODM, created back end server routes, created the logic behind sorting, flipping and deleting the flashcards, and set up a user provider using React.js.
- Documented all code changes in Github
- Exhibited excellent communication skills presenting the final web application to industry professionals and other developers with rave reviews.

Technologies used: Firebase, JavaScript, React.js, Bootstrap, CSS, HTML5, MongoDB, Google Translate API, Express.js, Node, Axios, Mongoose.

Eat The Burger | https://github.com/Jessica264365/Eat-The-Burger| https://frozen-ravine-20884.herokuapp.com
This is a burger logging application that demonstrates the use of ORM utilization, Handlebars, MySQL, Node, and Express. When a burger is added by the user it is saved in a MySQL database until it is "devoured".
- Delivered build, tested, and released a responsive website experience hosted on Heroku.
- Produced every file for the front and back end of this application and created my own ORM for optimal functionality.
- Implemented the MVC file structure.
- Strived to solve any bugs on my own through my own research and knowledge.

Technologies used: JavaScript, MySQL, Express.js, Bootstrap, HTML5, CSS, Handlebars.js, jQuery, Node.

Employee Directory | https://github.com/Jessica264365/Eat-The-Burger| https://frozen-ravine-20884.herokuapp.com
An employee directory that uses the Random User API. Employees are displayed in a table and can be sorted by name or sorted by using the search bar.
- Deployed the React application to Github pages successfully.
- Exhibited a knowledge of earlier lifecycle and state methods before hooks.
- Employed the React-Bootstrap library.
- Completed the mini project in 2 days.

Technologies used: JavaScript, React, Node, Bootstrap, CSS, Axios

EXPERIENCE

Cafe Manager   November 2013 – March 2021
Uptown Espresso   Seattle, WA
Was tasked with overseeing the daily needs of the cafe. Collaborated with baristas to insure the best cafe experience for our customers.
- Promoted to a busier location as result of revenue increase and decreasing labor and food/beverage costs at a previous store.
- Increased the star rating on Yelp by providing consistent and exceptional customer service for 7 years and was thanked with great customer reviews.
- Mentored and trained new baristas on shift and implemented a daily log for cleaning tasks that optimized the team.
- Analyzed and enhanced the tracking of store inventory which led to less waste
- Placed all the orders for the store precisely ensuring that money wasn't wasted during COVID shutdowns.
- Assisted the company in transition over ownership, ensuring policies and regulations were effectively maintained and tasks were completed.

EDUCATION

Full Stack Web Development Certificate: University of Washington, Seattle, WA
- A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node Js, MySQL, MongoDB, Express, Handelbars.js & ReactJS. Became familiar with code versioning tools such as Git. Worked in teams to ensure that the applications we created were functional and responsive.
